

Quick Guide: How to Create a New Listing

Create, edit, and manage your listings directly from your Ocusell List™ dashboard!

How to Create a New Listing:

1 Click “+ Add Listing” in the top right-corner of your listing dashboard. A modal will appear with options to create a listing from scratch, clone an off-market listing from the MLS, or import an active listing or create a listing from scratch. Select “New” for a new listing.

2 Enter the property address, listing agent, select one or multiple MLSs, and hit submit! Ocusell instantly pulls data from 60+ public data sources to autofill as much listing information as possible. Pre-filled fields are highlighted in blue.

3 Once your listing is created, you can easily input data, save it as a draft at any time, and publish it when you're ready! Draft listings will be saved in your “Pre-Market” dashboard.
